

DBSAE – Joint Contingency Contracting System

Overview

The Joint Contingency Contracting System (JCCS) provides procurement professionals a source of data entry for contracting and financial data to support mission spend analysis, strategic sourcing and staffing requirements. JCCS output produces contract and financial reports to support the warfighter's overall acquisition forecasting.

Capabilities

The JCCS program provides modern automation tools to the contracting community, thereby providing World Class contingency contracting support to our warfighters. JCCS supports the acquisition warfighter's ability to report on individual and collective spend data throughout the theater of operations. Additionally, it provides enhanced Host Nation vendor registration and management, and culturally relevant (English/Arabic) means of posting solicitations and tracking proposals from host nation vendors.

JCCS output produces a location for storing all reconstruction contracts in Iraq and Afghanistan, to track vendor past performance, to allow the posting of all Iraqi and Afghani reconstruction solicitations, to provide a location for vendors to submit proposals, to track all historical reconstruction contract data, and to allow oversight of in-theatre contracts to monitor cost, schedule, and performance, and vendor activities against their prescribed missions.

Benefits

- Centralized web-based reporting and tracking tool that provides transparency into dollar spend and contract award in Iraq and Afghanistan
- Real time database for contract information and reporting by producing ad-hoc reports on-demand addressing Commander's critical customer requirements for operational and strategic decision making
- Reports to DoD and federal organizations' stakeholders in 20 Iraq and 7 Afghanistan Regional Contracting Commands (RCC) and 10 Special Operations Command (SOCOM) contracting offices throughout the world.
- Captures critical in-theater acquisition and vendor data with emphasis on host nation spending
- Provides centralized vendor registration, solicitation and proposal posting website with English and Arabic capabilities for more than 35,000 vendors
- Captures critical in theater acquisition and vendor data with emphasis on Host Nation spending
- Serves as the primary centralized web-based reporting tracking tool
- Real-time database for contract information and reporting producing over 20 reports on demand
- Hosted in DISA secured network infrastructure

JCCS is a program under the Business Transformation Agency's (BTA) Defense Business Systems Acquisition Executive (DBSAE) directorate. DBSAE is responsible for driving the successful implementation of DoD systems and initiatives in support of the Department's business transformation goals. BTA's mission is to develop, coordinate, and integrate projects, programs, systems and initiatives providing DoD enterprise-wide business capabilities to the Warfighter.

Web site Address:

Stakeholders Served:

Joint Contracting Command-Iraq/Afghanistan (JCC-I/A) uses JCCS in 27 Regional Contracting Commands (RCC) (20 Iraq and 7 Afghanistan) and 10 SOCOM Forward Operating Bases (FOB) that deliver contingency contracting services to all the major DoD components: Army, Navy, Air Force, and Marines and report to other DoD and other Federal Government stakeholders. JCCS is installed on more than 500 DoD desktops and manages the registration data of more than 35,000 Host Nation and other international vendors.
